

ABSTRACT OF THE DISCLOSURE

5 A pager belt buckle device for conveniently combining a belt
buckle with a pager unit. The pager belt buckle device includes a
belt buckle member having an upper elongate support portion and a
lower elongate support portion being spaced apart and further
having a housing portion integrally attached to the upper and lower
10 elongate support portions and being disposed therebetween and
being recessed along a longitudinal back side of the elongate
support portions thus forming a belt receiving slot between the
upper and lower elongate support portions; and also includes pin-
like support members being removably connected to the upper and
15 lower support portions and extending therebetween; and further
includes a catch member hingedly mounted about a first of the pin-
like support members; and further includes a pager assembly for
receiving radio signals.
